

Habib Hakeem

Graphic Designer | Python Developer | Electrical Engineer

An insightful individual with an array of skills with a passion for growth and development in order to bring the best value to any organization. A good team player with excellent social and communication skills; working collaboratively with colleagues and liaising with clients to provide top-notch client satisfaction. Highlighted below are core skills and values that will be brought to the team.

- A fast learning, goal oriented individual, well versed in the fields of digital media creation including graphic design, video editing and audio engineering (foley, record production which includes mixing and mastering).
- An intermediate level of skill in Python Development, with past projects available Github.com. Python Development Certification from the world-renowned National Institute of Information Technology, Abuja, Nigeria.
- Well versed in Electrical Electronics Engineering with a specialty in power systems, automation and controls. Previous roles in this field involve: developing technical studies and investigations, switch yard inspection, restoration of tripped feeders, monitoring distribution of energy generated and recording of SCADA data with Microsoft Excel. Continued professional development by learning and implementing knowledge surrounding safe working practices in Electrical Engineering.
